

FOOD PROCESSING PLANTS INCREASE PRODUCTION

MOBILIZING IPG'S SUPPLY CHAIN TO KEEP FOOD PRODUCTION MOVING

With grocery store shelves emptying at an alarming rate, it is even more crucial that food processors have the packaging materials they need to accommodate their ramped up production. Now more than ever, these materials need to get to food processors so they can pack, palletize and safely deliver product to the stores. In these times of uncertainty, it's important to have a source you can rely on for all your packaging needs. **IPG is ready to help you help others** with a full array of domestically available packaging supplies to keep up with an unprecedented demand for shipped goods.

- **Carton sealing tapes** designed to work in a variety of conditions, including damp, cold and frozen environments
- **Water-activated tapes** provide tamper evident packages and help reduce pilferage
- **Food grade shrink films** certified under the Global Food Safety Initiative (GFSI)
- **Filament tapes** for use on gaylord containers in meat processing plants
- **Food grade stainless steel case sealing machines** allow for detergent wash down at low pressure, adding value to any food processing environment
- **Stretch films** for palletization help product reach the stores securely

Contact your IPG representative today for all your food processing solutions!
