The “Balanced”, Breathable Membrane Building Wrap.

NovaWrap™ ASPIRE™.

Balanced water vapor permeance allows water vapor inside the wall cavity to escape without allowing moisture drive from the exterior under high humidity conditions.

The “balanced”, breathable membrane building wrap... NovaWrap™ Aspire™

- ✓ Unique **moisture vapor transmission** allows your home to properly “breathe” (moving water vapor from the wall cavity to the outside) enabling your wall system to properly ventilate by truly “balancing” the proper air and vapor flow
- ✓ **Meets or exceeds applicable code listings** for vapor retarders as well as air and water barriers
- ✓ When properly installed, creates a **continuous membrane (a protective air barrier)** around a structure, covering all the gaps created by sheathing products, wall penetration points and other minor openings
- ✓ **15 Year Limited Warranty** offering confidence in our IPG® material performance and manufacturing to meet the difficult “breathable” building standards of today
- ✓ **Strong and durable**, non-woven design with a breathable coating membrane minimizes tearing and improves installation time and quality
- ✓ **UV stable up to 6 months**, ensuring a protected structure prior to final exterior materials installation
- ✓ **Translucent and lightweight** material installs quickly giving the ability to find studs and openings along with vertical and horizontal lap marks
- ✓ **“Quiet”**, softer material that has no annoying “flapping” sounds in the wind
- ✓ Installs over and protects most all sheathing materials and behind most all exterior cladding materials (e.g., brick, stone, stucco, EIFS, cement board, wood, vinyl, metal and composites)
- ✓ **Class A Fire rated** material to meet the rigid building standards of today
