ANTI-CORROSION

VCI STRETCH FILM

VCI Stretch Film is an innovative vapor corrosion inhibiting (VCI) stretchable plastic film for banding and wrapping large metal parts in shipment or storage. Our co-extruded linear low-density polyethylene (LLDPE) stretch film combines excellent strength properties achieved by utilizing multiple resins in three distinct, pure layers. VCI2000[®] stretch film provides a cost effective solution for corrosion protection of ferrous and most non-ferrous metals.

LONG TERM CORROSION PROTECTION

The slow release vapor action protects the exterior as well as hard-to-reach interior surfaces. It is self-healing and will provide 24 months of long-term protection for storage and overseas shipments.

FEATURES & BENEFITS

- High puncture and tear resistance
- High cling levels
- For hand or machine wrap applications
- Metals protected: Carbon steel, stainless steel, copper, brass, aluminum, silver, galvanized steel
