

JANITORIAL AND SANITATION PRODUCTS HAVE NEVER BEEN MORE IN DEMAND

PACKAGING NEEDS FOR JAN SAN SUPPLIES AVAILABLE FROM IPG

Keeping surfaces clean and spaces free of germs and viruses is hard and repetitive work. As we slowly return to work, the demand for chemicals and supplies to keep up with both domestic and industrial needs will continue to pressure the Jan San supply chain. Packaging of chemicals, paper, waste disposal and other materials is expected to stretch production lines to the limit. **IPG is ready to help!** To keep up with the much needed packaging for this expanded demand, IPG has assembled a full array of domestically available packaging supplies to get you through the growing peaks. We don't have a definitive end in sight but we do know that the demand is imminent.

- **Carton sealing tape** in a variety of adhesive formulations to ensure a secure and reliable bond. Available in both short and automation long rolls.
- **Case sealing machines and tape heads** for improved productivity and reduced labor. Semi-automatic, easy to install and designed to help you expand through the oncoming peaks.
- **Water-activated tape**, by far the most secure form of closure, provides tamper evidence as a deterrent to pilferage, while being recyclable.
- **Shrink films** with crosslinked technologies designed to deliver crystal clarity, seal retention and load containment like no other.
- **Filament tapes**, ideal for bundling and unitizing, as well as reinforcement for gaylords used to hold excess production.
- **Stretch Films** in a variety of widths and gauges to support your outgoing shipments through an increasingly busy supply chain.

Contact your IPG representative today for all your janitorial and sanitation solutions!
