

USE ANCHOR STENCIL? TRY THESE STENCIL SHOP PRODUCTS!

Masking Tape

General purpose masking tape is commonly used in monument headstone manufacturing for temporarily securing various components to the stencil during the fabrication process. Specialized masking tapes may be employed for specific applications, such as precision detailing or protecting the backs or sides of monument surfaces from ricochets during blasting. These tapes help prevent damage to the monument at different stages of the manufacturing process.

PE Tape

Clean removal polyethylene tapes can be a cost-effective alternative to duct tape in indirect blasting protection for monument stone manufacturing. They provide a secure seal to the patch material and the stone without leaving adhesive residue upon removal.

Duct Tape

For years, cloth duct tapes have been used as a practical solution to protect the edges of a patch stencil during sandblasting and remove cleanly with the stencil. Duct tape serves as a barrier that shields the surrounding areas from overspray, ensuring a cleaner and more precise finished monument stone. Because of the aggressive tack built into the adhesive formulation, prompt removal of the tape from the stone is highly recommended.

Carton Sealing Tape

Clear carton sealing tape may be used as a transfer tape for stencils on monument headstones. The adhesive is strong enough to adhere to the stencil material and maintain the integrity of the letters, especially when used with single liner stencils. Standard carton sealing tape can be used to seal rolls of stencil while moving from the plotter room to the shop as well as for general shipping applications.

Reinforced Construction Paper

3-way fiberglass reinforced natural kraft paper used as a protection for finished floors/surfaces during construction or remodeling/repair. Non-bleeding, non-staining. Skid and slip resistant. Water and oil resistant. Withstands medium to heavy foot traffic.

Double-Coated Tape

Strong double face adhesive tapes often used for mounting items such as pictures or metal medallions to monument stones. They provide a secure and durable bond, ensuring the attachment remains stable over time. When used with a silicone bead around the object being secured it makes for a long-term bond.

Adhesive Transfer Tape

Adhesive transfer tape serves as a solventless filler during the blasting process. It allows the stencil to stick to another tacky surface. The linerless film covers the stone, sticks to the stencil and removes cleanly when the stencil is removed after blasting. Adhesive transfer tapes makes the blasting of death dates much more manageable.

AC50 Adhesive Spray

Designed to assist bonding to several surfaces, including wood, concrete and sheet metal. Contains no methyl chloride or CFCs; 41 PSI shear strength.

ITEM	STYLE	DESCRIPTION
PT14	Masking Tape	Removes cleanly up to 14 days after application, even when exposed to direct sunlight & high humidity.
OM (OrangeMask®)	Masking Tape	Can attach to polished black granite for 5-7 days.
PE7	PE Tape	"The white tape" remains on the stones for days without the worry of residue, reducing cleanup efforts and potential surface damage; pinked for easy hand tearing.
Iron Grip AC617	Duct Tape	Heavy duty 17 mil duct tape with aggressive adhesive designed to meet demanding applications; easy dispensing from roll.
6100 LPT	Clear CST	Good for edge reinforcing, splicing, hinging, and tabbing. Resistant to moisture, chemicals, oils and acids.
Cons Paper	Construction Paper	Reinforced construction paper for surface protection.
SGAFT450C	Acrylic Foam Tape	Very high bond double-coated tape for permanent bonding. Also available in black and grey.
ATA200	Acrylic Transfer Adhesive	2 mil glass-filled acrylic pressure-sensitive adhesive applied to an easy release liner with excellent adhesion properties and resistance to ultra-violet (UV).
AC50SP	Adhesive Spray	Web spray pattern adhesive. Compliant with the National VOC Regulations for consumer products and the current VOC limits for aerosol adhesives in California. Net weight 12oz.
