

products that get the JOB DONE

CHILL-R

2-Piece Recyclable Kraft Paper Insulated Shipping Material

- Paper-based curbside recyclable insulation material laminated to paper
- Certified for direct food contact
- Two-piece recyclable insulation offers easy assembly and increased productivity for fast-paced operations
- Ships and stores flat, taking up less space on a truck or in the warehouse

INFINITYCORE

2-Piece Sustainable Recycled PET Thermal Liner

- For transport and protection of temperature-sensitive products
- Requires the use of fewer gel packs or less dry ice than other non-PET material liners
- Replaces the need for EPS coolers
- Thermal performance up to 72 hours
- Lightweight and cost effective
- Shipped flat to save storage space
- Non-toxic and non-irritating
- Designed to meet tight tolerances by eliminating air gaps

METALIZED BUBBLE MAILERS

- Help keep temperatures consistent and help control the movement of moisture and odor
- Ideal for chocolate & confectionery, baked goods, laboratory samples, medical supplies, cosmetics, and floral

METALIZED BUBBLE CUSHIONING

- For short cycle shipments
- Helps keep temperatures consistent and helps control the movement of moisture and odor
- Ideal for chocolate & confectionery, baked goods, laboratory samples, medical supplies, cosmetics, and floral

VENOM

Reinforced Water-Activated Tape

- Used for two strip sealing cartons top and bottom
- Works well on recycled cartons, and non-unitized loads
- Recommended for use on cartons w/average weight up to 20 pounds (9 kg)
- Custom printing / branding available

6151QT / 7151 QT

1.70 / 1.95 Mil Cold Temp Hot Melt Carton Sealing Tape

- Excellent processing performance whether manually or automatically applied
- For medium weight, automatic box sealing applications, at room temperature as well as cooler food packaging and processing applications
- Case sealing automation, refrigerated transport storage

EXLFILMPLUS PCR®

Performance Shrink Film with PCR

- Contains 20% certified post-consumer recycled content
- Contains 25% certified post-industrial recycled content
- 7% - 9% less film used when compared to standard products**
- Pre-qualified for the How2Recycle store drop-off label
- Wide window of operation - performs across a complete range of applications and equipment. Ideal for older equipment.
- High shrink force - ensures greater package integrity for multi-pack applications

**When comparing 55G vs 60G films or 70G vs 75G films

170

1.75 Mil Utility Acrylic Carton Sealing Tape

- Light weight non-critical box sealing applications exposed to minimal shipping hazards and stress
- Case sealing automation, refrigerated transport storage
- Resistance to aging, weathering, UV light, and yellowing

EXLFILMPLUS 365®

All Purpose Shrink Film

- 7% - 11% less film used when compared to standard products
- Pre-qualified for the How2Recycle store drop-off label
- Quick shrink initiation - ideal for customers with higher speed production, running older equipment or shorter length shrink tunnels
- Wide operating window - performs across a complete range of applications and equipment
